

1. The window well should be at least 4-6" longer than the window opening.
2. The window well should be high enough to extend 4-6" above the soil grade as well as extend at least 8" below the bottom of the window.
3. We recommend that window wells are appropriately fastened to walls using prepunched holes to prevent movement after installation.
4. All dimensions in inches. Technical specifications and custom sizing available on request.

[illegible]
